

## Claims

- [c1] 1. A cleaning implement for cleaning golf equipment, comprising:
  - a flexible fabric material;
  - at least two abrasive regions attached in spaced relation on said flexible fabric material, said abrasive regions dimensioned and disposed for placement in spaced, at least partially overlying relationship, whereby an item to be cleaned may be placed between said abrasive regions for cleaning.
- [c2] 2. The cleaning implement of claim 1, wherein at least one of said abrasive regions comprises hook or loop fastening material of the type used in cooperating hook and loop fasteners.
- [c3] 3. The cleaning implement of claim 1, wherein each of said abrasive regions comprises hook or loop fastening material of the type used in cooperating hook and loop fasteners.
- [c4] 4. The cleaning implement of claim 1, wherein each of said abrasive regions comprises hook or loop fastening material of the type used in cooperating hook and loop

fasteners, with both of said abrasive regions comprising the same type of fastening material such that said regions will not stick together.

- [c5] 5. The cleaning implement of claim 1, wherein at least one of said abrasive regions comprises a non-metallic scrubbing material.
- [c6] 6. The cleaning implement of claim 1, wherein said abrasive regions comprise different abrasive materials having different textures.
- [c7] 7. The cleaning implement of claim 1, wherein said cleaning implement comprises a towel.
- [c8] 8. The cleaning implement of claim 7, wherein said abrasive regions are attached in a corner region of said towel.
- [c9] 9. The cleaning implement of claim 7, further comprising ornamental or promotional indicia secured to said towel.
- [c10] 10. The cleaning implement of claim 7, further comprising a pocket secured to said towel, and said abrasive regions disposed within said pocket.
- [c11] 11. The cleaning implement of claim 10, wherein said pocket is at least partially stitched to said towel.

- [c12] 12. The cleaning implement of claim 10, wherein said pocket is at least partially secured to said towel by releasable fasteners, such that said pocket may be at least partially opened.
- [c13] 13. The cleaning implement of claim 12, wherein said releasable fasteners comprise snap fasteners.
- [c14] 14. The cleaning implement of claim 12, wherein said releasable fasteners comprise cooperating hook and loop type fasteners.
- [c15] 15. A cleaning implement for use in cleaning golf equipment, comprising:
  - a towel comprising a flexible fabric material;
  - a pocket secured to said towel; and
  - at least two abrasive regions attached in spaced relation on said flexible fabric material, said abrasive regions dimensioned and disposed for placement in spaced, at least partially overlying relationship, whereby an item to be cleaned may be placed between said abrasive regions for cleaning.
- [c16] 16. The cleaning implement of claim 15, wherein said pocket includes a first edge portion stitched to said towel and a second edge portion secured to said towel by releasable fasteners such that said pocket may be at

least partially opened.

- [c17] 17. The cleaning implement of claim 16, wherein said pocket is disposed at a corner region adjacent a first end of said towel and further comprising an attaching mechanism for attaching said towel to a golf bag or cart secured adjacent a second end of said towel substantially opposite said first end.
- [c18] 18. A cleaning implement for use in cleaning golf equipment, comprising:
  - a substantially rectangular towel having first and second opposite ends at respective top and bottom edges, said top and bottom edges connected by substantially parallel side edges, said towel comprising an absorbent flexible fabric material;
  - a pocket secured to said towel at a corner of said towel adjacent said first end, said pocket having two substantially perpendicular portions, one of said perpendicular portions extending substantially parallel to and stitched to a side edge portion of said towel, the other of said perpendicular edge portions extending substantially parallel to and secured by releasable fasteners to said bottom edge portion of said towel, whereby said pocket may be selectively opened;
  - at least two abrasive regions attached in spaced relation on an interior face of said pocket, said abrasive regions

dimensioned and disposed for folding into spaced, at least partially overlying relationship, whereby an item to be cleaned may be placed between said abrasive regions for cleaning; and

an attaching mechanism for attaching said towel to a golf bag or cart secured adjacent a second end of said towel at a top corner of said towel substantially diagonally opposite said pocket.

[c19] 19. A cleaning implement for use in cleaning golf equipment, comprising:

a glove adapted to be worn by a caddy or golfer, said glove comprising a flexible material and including top and bottom faces, a plurality of fingers, and a palm portion; and

at least two abrasive regions attached to said glove, said abrasive regions dimensioned and disposed for placement in spaced, at least partially overlying relationship, whereby an item to be cleaned may be placed between said abrasive regions for cleaning.

[c20] 20. The cleaning implement of claim 19, further comprising an ornamental or promotional indicia secured to said glove.

[c21] 21. The cleaning implement of claim 19, wherein one of said abrasive regions are disposed on said palm portion

on said bottom face of said glove, and the other of said abrasive regions is disposed on one of said fingers on said bottom face of said glove.

[c22] 22. The cleaning implement of claim 19, further comprising a plurality of abrasive regions, one of said abrasive regions disposed on each of said fingers and said palm portion on said bottom face of said glove, at least two of said abrasive regions having a different texture.
